DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2-4, 7-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Bose et al.
3. As per claim 1, Bose et al. discloses creating filler information, transmitting the digital information in combination with the filler information, receiving the transmitted information, storing the transmitted information, creating a recognition grid, and selecting portions of the received and stored transmitted information according to the recognition grid, thereby allowing at least a portion of the transmitted digital information to be communicated(see col. 7, lines 31-50, col. 8, lines 63-67, col. 9, lines 66-67, col. 10, lines 1-11, 45-60).
4. As per claim 2, Bose et al. discloses including the step of placing the filler information in a variable pattern within a digital information(see col. 12, lines 21-26)
5. As per claim 3, Bose et al. discloses a recognition grid adapted for use with an array of memory locations(see col. 8, lines 63-65, col. 9, lines 63-67, col. 10, lines 1-5), each of the memory locations having a unique address associated therewith(see col. 11, lines 23-26, lines 62-67, col. 12, lines 1-11), the recognition grid, including an array of at least one of the unique addresses of the plurality of memory locations; and a template which is used to select at least one of the unique addresses of the plurality of memory locations(see col. 23, lines 43-62).

Art Unit: 2131

6. As per claim 4, Bose et al. discloses a first computer adapted to selectively generate and transmit certain information; a second computer, in communication relationship to the first computer, and containing a plurality of addressable memory locations, and further adapted to receive the certain information, and to use this information to address the contained memory locations(see col. 7, lines 31-62, col. 11, lines 22-26).

7. As per claims 7-8, Bose et al. discloses the recognition grid wherein the template is a virtual template(see fig. 3, sheet 2).
